

# Audio/Video Requirements

for Damian Mason

*Requirements for:  
Funny on Purpose / Humor for the Heart of Agriculture*

- Lapel Microphone
- Lectern
- Stage or riser that is minimum of 12 inches high

- Damian uses lots of visual humor and crowd interaction, so bring up the lights to at least half power for best effect. He uses no power point or screen projection, so the light won't hurt, it will only help.
- A dynamic personality who is comfortable in front of people should read the introduction of Damian Mason.
- We request a break immediately following Damian's presentation. This allows your audience ample time to realize the impact and enjoyment of Damian's program.
- We request a table prominently placed in the back of the room for product sales and autographs (books, CDs, audios, stickers, etc..) Don't worry, Damian does not use your stage as a selling forum!!

- It is best to not include head tables when having a guest humorist. If your event demands a head table, please place Damian in another staged location.
- The guest tables / audience should be in close proximity to Damian during show for best audience interaction and response. Remember, laughter is contagious, and humor is intimate – big empty rooms and spread out crowds kill comedy and intimacy!
